Administrator's Statement 85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

Texas State University continues to be a leader in helping Texas achieve the goals of The Texas Higher Education Coordinating Board's (THECB) 60x30TX campaign. We would like to thank the Texas Legislature for the generosity shown in funding higher education in the 84th Session which has been instrumental in our continued success. In particular, Texas State appreciates the availability of tuition revenue bonds (TRBs), the support of formula funding, the continuing availability of the TRIP program, and the increases to the Higher Education Fund (HEF). The TRBs have allowed us to proceed with the construction of much-needed buildings for Engineering and Science on our San Marcos Campus and for Health Professions on our Round Rock Campus that will help to further our growth in research and STEM education. The HEF increase will make it possible to address a significant number of deferred maintenance issues and will help us keep up with our rapidly growing enrollment.

Texas State University is the state's newest Emerging Research University and is now the 31st largest public university in the country and the fourth largest university in Texas. With 37,979 students enrolled in fall 2015, Texas State experienced a five-year enrollment growth rate that was 55 percent higher than the combined five-year enrollment growth rate of all other Texas public universities. Our student body is now 48 percent minority and continues to become more diverse. Texas State has been recognized by the U. S. Department of Education as a Hispanic Serving Institution since 2010 and is one of only 40 doctoral-degree-granting institutions in the country to earn that designation.

The demand to come to Texas State is not slowing down and we remain committed to playing a key role in the success of 60x30TX by carrying our share of the necessary enrollment growth. In fact, we experienced a double-digit percentage increase in applications for fall 2016, and anticipate record enrollment for the 19th straight year. We already have over 30,000 applicants seeking one of our 5,700 spots in the fall 2016 freshman class. The primary constraint in being able to serve more students is physical space. Texas State has the largest academic space deficit of any school in the state of Texas, nearly three-quarters of a million square feet, and a total space deficit of over 1.2 million square feet according to the Texas Higher Education Coordinating Board's space projection model. Due to our continued enrollment growth, Texas State will still have these space deficits even after the openings of the new Engineering and Science building and the new Health Professions building mentioned above.

Our university's highest priority is student success. Texas State has the sixth highest six-year graduation rate in the state despite being funded at a rate that is the fourth lowest of the 38 public institutions of higher education in Texas. We are especially proud of the fact that our graduation rates are strong for all ethnic groups. While we have increased the total number of degrees awarded by 17 percent over the past five years, the number of degrees awarded to Hispanic and African-American students has increased by 57 percent and 78 percent respectively.

Texas State has long been focused on college affordability. This restraint in raising tuition has been achieved, in large part, by remaining dedicated to continuously improving our level of efficiency. Please find some examples of that efficiency below:

- Texas State spends 3.7 percent less today than it did in 2003 to deliver a unit of instruction after adjusting for inflation.

- Texas State would have to hire over 1,000 additional staff members to reach the average faculty to staff member ratio among the state's Emerging Research Universities as measured by THECB.

- Our faculty carry a teaching load 32 percent higher than the state average while being paid 12 percent below the state average.

As a university with thousands of veterans and their families currently enrolled, we fully support the spirit of the Hazlewood Act. In fact, Texas State has the highest number of Hazlewood program participants of any university in Texas. However, this largely unfunded mandate is placing a significant and likely unsustainable burden on the university. This is evidenced by the fact that total Hazlewood waivers have increased by more than 26 percent annually since 2012, and, even after accounting for the recent state-funded Hazlewood Permanent Fund endowment distribution and the Texas Veterans' Commission funding, Texas State predicts that the program will cost the university well over \$200 million in waived revenue over the next 10 years.

Administrator's Statement 85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

True to the goals of 60x30TX, Texas State University provides students with the marketable skills necessary to succeed in the workforce. The percent of Texas State baccalaureate graduates employed in the fourth quarter following graduation has been consistently higher than the state average in every year since 2001, and 8.6 percent higher in the most recent year. Additionally, our graduates are not only employed, they also express great satisfaction with the education they receive at Texas State. According to surveys conducted as a part of the Voluntary System of Accountability, our graduates rank us only behind Texas A&M in the percent who would "Attend the Same Institution if Starting Over Again" and the percent rating their entire educational experience "Good or Excellent."

Texas State fully supports the THECB's Formula Advisory Committee's recommendations on formula funding rates. Formula funding represents 77 percent of our general appropriation and is vital to the success of Texas State. Additionally, it is requested that the Legislature provide sufficient appropriations to cover the full cost of the Higher Education Group Insurance Program (HEGI). We estimate that the State's share of our employer contributions for health insurance is underfunded by \$1 million per year in fiscal years 2016 and 2017. The level of state support we are provided, including Core Research and TRIP funding, is a key factor in ensuring and increasing quality, enabling the achievement of strategic goals, and maintaining affordability.

Texas State has four exceptional item requests. We ask to continue state support for the Advanced Law Enforcement Rapid Response Training (ALERRT) Center in the amount of \$4,000,000 across the biennium. ALERRT was formally recognized by the FBI as the national standard in active shooter training in 2013 and has trained over 85,000 law enforcement officers since its creation in 2002. This program has been funded directly by the Office of the Governor in the past, and we have been encouraged to request replacement funding through the Legislative Appropriation Review process as funding from the Office of the Governor will not be available in the future.

Secondly, Texas State is requesting \$5,790,000 across the biennium to fund the Materials Application Research Center (MARC). The primary focus of MARC is to accelerate the development and deployment of advanced materials. A few examples of advanced materials might include things such as metallic glass to create lighter and stronger bullet-proof vests, fungi-based packing materials to provide a biodegradable alternative to Styrofoam, and flexible concrete for construction projects. In addition to directly supporting the academic mission of the university, this project will serve as a catalyst for economic development, entrepreneurial activity, and the attraction of established firms looking for applied research and development expertise and a pipeline of well-equipped students.

As required, this request includes only 96 percent of our prior year funding for special items. We have included, as an exceptional item request, the restoration of this four percent cut in the amount of \$359,076 across the biennium. If this cut to these items were to manifest in the final appropriations act, special item funding for several programs at Texas State would need to be eliminated. Those include the Semiconductor Initiative, the Geography Education project, and a portion of the Edwards Aquifer Research and Data Center. All three of these projects support crucial research and academic activity at Texas State. Also, the state funds provided to some of these programs are matched many times over by federal and private dollars, effectively multiplying the state's investment. The proposed cut to these programs would likely result in reciprocal cuts, or future funding decreases, from outside sources.

Finally, Texas State is requesting \$115,000 in annual operating funds for the Identification and Repatriation of Unidentified Human Remains in South Texas Project. This project will allow Texas State University to continue efforts to exhume and identify human remains in three South Texas counties in accordance with the Texas Criminal Code of Procedures. Not only does this project directly help local law enforcement and Justices of the Peace, it also benefits all persons living in Texas that are searching for a missing family member, and the project directly supports Texas State's proposed new Ph.D. program in Applied Anthropology.

In preparation for responding to the 10 percent general revenue-related base reduction schedule, the institution evaluated all general revenue funding and deemed every appropriated general revenue dollar critical to our core mission of teaching, research, and public service. Because of limited alternatives, the institution is forced to

Administrator's Statement

85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

propose reductions spread across all general revenue funded initiatives in addition to the elimination of funding to the Edwards Aquifer Research and Data Center, which plays a key role in water management throughout Central Texas. It is imperative to note that these proposed reductions would negatively and painfully impact our core operations and delivery of services to students.

The continuous growth in total enrollment, total degrees awarded, and minority graduates, combined with our high employment rate and student satisfaction results, demonstrate Texas State's commitment to continuing to be a key partner in contributing to the goals of 60x30TX.

I look forward to discussing our request with you. Denise M. Trauth President

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

| OBJECTIVE: | 1 Provide Instructional and Operations Support | | | Service Categori | ies: | |
| GOAL: | 1 Provide Instructional and Operations Support | | | | | |

This strategy provides for the costs of activities or enterprises separately organized and operated in connection with instructional departments primarily for the purpose of giving professional training to students as a necessary part of the educational work of the related departments.

At Texas State this includes the operations of the Freeman Ranch, the Childhood Development Center, Speech & Hearing Clinic, the Sleep Lab, the Physical Therapy Clinic, and the Clinic for Autism Research, Evaluation, and Support.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The effectiveness of this strategy is affected by a number of internal and external factors such as salaries paid to comparably qualified staff members within the region, the client load of the student clinicians, the availability of comparable services in the surrounding community, market prices that can be charged for services and that are received for goods sold, market prices that must be paid for raw materials, the level of supervision that is provided, and the cost of capital equipment necessary to support the operation.

| CODE | DESCI | RIPTION | Exp 2015 | Est 2016 | Bud 2017 | (1) BL 2018 | (1) BL 2019 |

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

To pay the principal and interest on revenue bonds authorized by the 73rd, 75th,77th, 80th, and 82nd legislatures and issued pursuant to Sec. 55.17 of the Education Code and the Bond Resolution adopted by the Board of Regents, Texas State University System.

Debt service amounts for the various TRB issuances are based on actual debt service schedules.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Alliance for Geographic Education (Texas Alliance) is part of the National Geographic Society's Network of Alliances for Geographic Education (Network of Alliances). The Texas Alliance is a university-based, statewide partnership between university faculty and K-12 educators that provides teachers with professional development, networking, model programs, and teaching materials in geography education.

The Texas Alliance was established in 1986, one of eight original state alliances sponsored by the National Geographic Society (NGS).

The Texas Alliance for Geographic Education recognizes that there is a lack of understanding of geography's value and its application within the Texas educational community. To address this issue, the Texas Alliance supports and advocates for geographic education in the Texas educational community.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Round Rock Campus is to meet the higher education and workforce training needs of North Austin and Williamson County. Although the RRC started as an evening program and about 90% of the students still continue to enroll on a part time basis in the evenings and work during the daytime, the Nursing students are daytime students and utilize campuses services throughout the daytime. Additionally, because the classrooms in the main building, the Avery Building, are at close to 100% utilization in the evenings, classes are moving into the daytime and will continue to do so over the next two academic years. The Health Professionals Building #1, which will open in summer of 2018 will serve students who are also primarily daytime students. This shift to daytime enrollments will continue to require expansion of student support services and programming and will require very careful scheduling of classrooms. Continued funding of the staff positions is needed in order to meet the growing demand.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas School Safety Center (TxSSC) at Texas State University was created in 1999 by former Governor George W. Bush following the tragic shooting at Columbine High School. The TxSSC, an official university-level research center, is tasked in Chapter 37 of the Texas Education Code and the Governor's Homeland Security Strategic Plan with key school safety initiatives and mandates. Specifically, the TxSSC serves as a central clearinghouse for the dissemination of school safety and security information through research, training, and technical assistance for K-12 schools and junior colleges throughout the state of Texas. Additionally, the TxSSC is to serve as a resource for the prevention of youth violence and the promotion of safety in the state.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Special Item is to perform research and disseminate information about the Edwards Aquifer and the regional water resources; to offer laboratory and technical services to public and private entities and support graduate research; to use data created to provide educational services for schools and the public. The Center coordinates its activities with those of other water related centers at Texas State and in Texas. The Center provides opportunities for students to get experience working in the water resources field. We also provide jobs for many students and provide facilities for graduate and undergraduate research. Through our education program of field days and summer camps we expose numerous precollege students to experiences in the water field. The time they spend at our center allows them to get insight into the college experience and may encourage them to seek admission to Texas State in the future. It is important that we have an informed citizenry regarding water resources and we feel our programs aimed specifically at students will promote this. The importance of having a working water laboratory that is always available to support research, classes, and educational activities cannot be overemphasized. Few universities have NELAC certified laboratories that can produce data acceptable to state and federal agencies. A better understanding of the activities of the Center can be gained by looking at our website.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The primary mission is to develop the scientists, engineers and other technical/professionals for the Texas workforce to promote economic development. An underlying theme is an increased emphasis on interdisciplinary research, with a strong focus of research training at all levels. We have hired numerous research–intensive faculty in the past eight years. The future competitiveness of Texas and the U.S. is tied to technological innovation tightly coupled with commercialization, which will come largely from such scientists using new paradigms of interdisciplinary research and technology transfer. Texas State has positioned itself to be closely aligned with Texas industry by establishing programs to create a cutting-edge materials science, engineering and commercialization infrastructure focused on research, development, and validation of materials for the next generation of electronics, medicines, plastics, sensors, and renewable energy. In addition, these academic and research capabilities are being supported by an institutional 'top-to bottom' entrepreneurial and commercialization culture. Our intention is to serve as a launching platform for developing effective entrepreneurial leaders for the advancement of global innovation, including increasing total technical degree holders both enrolled and graduated with an emphasis on outreach to women and minorities.

DESCRIPTION / JUSTIFICATION:

As required, this request includes only 96 percent of our prior year funding for special items. We have included, as an exceptional item request, the restoration of this four percent cut in the amount of \$359,076 across the biennium. If this cut to these items were to manifest in the final appropriations act, special item funding for several programs at Texas State would need to be eliminated. Those include the Semiconductor Initiative, the Geography Education project, and a portion of the Edwards Aquifer Research and Data Center. All three of these projects support crucial research and academic activity at Texas State. Also, the state funds provided to some of these programs are matched many times over by federal and private dollars, effectively multiplying the state's investment. The proposed cut to these programs would likely result in reciprocal cuts, or future funding decreases, from outside sources.

DESCRIPTION / JUSTIFICATION:

Since the early 2000's, the frequency of active shooter events has dramatically increased. We have seen an average of 18 active shooter events per year during the last five years. Additionally, there were three terrorism inspired attacks in 2015. One of which occurred in Garland, TX. Internationally, there have been a number of attacks directly planned and organized by terrorist groups such as ISIS. The most recent of these was in Paris. Terrorist groups are attempting to organize and launch similar attacks here.

In order to mitigate the damage caused by these attacks, law enforcement officers must be effectively trained and prepared. This is the mission of the Advanced Law Enforcement Rapid Response Training (ALERRT) Center at Texas State University. ALERRT has developed a definitive, research-based standard in active shooter response.

ALERRT tactics involve the immediate and decisive deployment of law enforcement officers to stop the killing as quickly as possible. After the killing has stopped, ALERRT teaches lifesaving skills that can be utilized to keep those who have been wounded from dying.

Another problem facing Texas Law Enforcement is our border with Mexico. One of the largest areas of concern for our law enforcement officers is encountering narco-terrorists and human traffickers willing to attack officers. ALERRT has developed a curriculum that is specifically designed for law enforcement officers in outdoor situations. The Exterior Response to Active Shooter Events (ERASE) program allows officers along the border of Mexico to effectively and safely handle potentially deadly situations.

DESCRIPTION / JUSTIFICATION:

The primary focus of MARC is to accelerate the development and deployment of new technologies using advanced materials to support the following: the next generation of sensors for a wide variety of applications (ranging from smart infrastructure in support of autonomous vehicles to biomarkers for health), renewable energy devices, micro-grid management, advanced polymers, microelectronics, rapid prototyping to advance product commercialization and pilot scale production to move from concept to production.

MARC will provide a seamless environment integrating applied multidisciplinary academic research, industry sponsored projects, and experiential learning opportunities for students addressing creation of a talent pipeline. By providing access to specialized tools and expertise early stage firms developing tangible products will be able to bypass the large initial capital outlays which pose a significant barrier to market entry, and small to mid-sized companies will be enabled to more quickly develop and commercialize new products.

The Entrepreneur in Residence, Innovator in Residence and Visiting Scholar will enable the University to provide value beyond core equipment facility accessible to business and academic researchers. They will : (1) vette proposals to quickly identify those with the greatest opportunity for commercialization; (2) provide technical and business mentoring to selected startup and early stage firms collaborating with MARC; (3) accelerate decisions to proceed or seek alternatives and (4) create a support structure which will increase the number of startups focused upon tangible products development in the region.

MARC will result in the attraction of additional capital resources supporting company growth by focused proposal screening, reduction in early capital demand and company management support through mentors. The region will also become more attractive to established firms seeking applied R&D resources and a pipeline of students.

DESCRIPTION / JUSTIFICATION:

In 2012, Brooks County, Texas gained media attention for a dramatic increase in the number of migrant deaths. In 2013, Brooks County received state funds to send all remains to Webb County for autopsy, DNA sampling, and identification efforts. Prior to 2013, all unidentified human remains found in Brooks County were sent to a funeral home in Mission. The remains not identified through funeral home efforts were buried in Sacred Heart Memorial Park in Falfurrias. Although two seasons of exhumations have taken place, there are still an estimated 60 individuals buried in Sacred Heart. While these individuals are presumed migrants, there could be unidentified American citizens buried in the cemetery. According to the Texas Criminal Code of Procedures Chapters 49 (deaths requiring and inquest) and 63 (submission of DNA samples to University of North Texas), these individuals need exhumation, analysis, and DNA sample submission for identification purposes.

It has been found that additional counties along the border may follow the TCCP by providing autopsy, but fail to follow through with DNA submission, bury remains with temporary markers that disintegrate quickly, and fail to associate the burial with a plot number and/or case number. Thus, while the TCCP was followed, many of these remains still have no chance of identification. Additionally, some counties are not in compliance, still using a funeral home to provide identification services. Burials originating from Cameron (n=40) and Starr (n=26) counties also need exhumation and analysis. Discovery of additional burials is ongoing.

The proposed project is a direct benefit to the community of Brooks, Cameron, and Starr counties as it helps local law enforcement and Justices of the Peace fulfill the TCCP 49 and 63. Further, this project benefits all persons living in Texas that are searching for a missing family member. If these burials are not exhumed, families will never know the ultimate fate of their loved ones

B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals

Attainment:

The agency attained or exceeded 1 of 6, or 16.7 % of the applicable statewide HUB procurement goals in Fiscal Year 2014.

Applicability:

Applicable to all procurement categories

Factors Affecting Attainment:

• HUB Vendors' difficulty in meeting bonding and insurance requirements as either a prime contractor or a subcontractor in the Building Construction and Special Trade categories.

• Use of Indefinite delivery/indefinite quantity (IDIQ) contracts for Special Trade categories to leverage spend for smaller remodel and repair projects provides limited bidding opportunities for HUBs.

"Good-Faith" Efforts:

*Economic Opportunity Forums (EOF's) /HUB Outreach Events - Hosted HUB Construction focused EOF's in FY2014 and FY2015. Participated in regional and statewide EOF's and other HUB focused outreach events

*HUB Certifications - Vendors assisted in obtaining Texas HUB certification (FY14 - 5 & FY15 - 2)

*HUB Mentor-Protégé - M-P relationships sponsored (FY14 - 1 & FY15 - 2)

*HUB Vendor Training - Held 1-on-1 consultations with HUB Vendors to educate them on doing business with Texas State (FY2014 - 30 & FY2015 - 18). In addition, offered educational seminars to HUBs in "Obtaining Bonding" and "How to Respond to Procurement Solicitations".

*HUB "Best Practices" - Actively participated in HUB Discussion Work Group (HDWG) and Texas Universities HUB Coordinators Alliance (TUHCA) to identify

USE OF HOMELAND SECURITY FUNDS

The following budget is divided into fixed, development, and delivery costs. The development budget will support the development of 1) an awareness-level training tool video documenting law enforcement needs for T-ECC based medical training and, 2.) a 3 day performance-based course built on the ALERRT Level II medical course for law enforcement first responders. The objective of this awareness-level training tool is for police executives, decision makers, and policy makers to recognize the importance and need for this type of training and equipment, as well as, to identify preparedness gaps within their own agencies. The goal of the new performance-based course is to instruct law enforcement, fire and EMS personnel in T-ECC based medical concepts as well as the integration of the three disciplines into a mass shooting response. These concepts include triaging, law enforcement active shooter response tactics to include preparing for/detecting secondary attacks, Rescue Task Force (RTF) concepts for police/fire/EMS, and incident command strategies and best practices. 20% of the budget is directed toward development and 30% is toward delivery.

The video will be mass-produced and distributed on-line (ALERRT.org) as well as at trade shows, through professional organizations, associations, training academies and existing ALERRT course deliveries. The ALERRT website averages more than 6,000 hits per month with more than 30,000 page views. The goal for Phase 1 is the distribution and viewing of the awareness video by 10,000 individuals during the performance period. The goal for the performance-based, hands-on course will be to deliver the course to 520 law enforcement, fire and EMS professionals across the nation.

Through the awareness-level video training tool and the performance-based three day response to mass casualty medical course ALERRT will train and provide outreach to a total of 10,520 students for a cost of \$95 per student.

1 Edwards Aquifer Research and Data Center

Category: Programs - Service Reductions (Other)

Item Comment: Loss of funding would result in our being unable to maintain the level of services, educational outreach, and support of student research activities. This is already demonstrated by decreased external funding. This occurs at a time when the demand is increasing. We would have fewer funds to leverage for match with external funding. We try to increase our outside funding every year and this funding is critical in allowing us to continue that. Hydrologic conditions in the region (floods and droughts) mean that our services, information, and activities are in great demand and we need the requested funds to meet that demand. Our center is a major supporter of the Aquatic Resources PhD program at Texas State.

We provide an opportunity for education of public & private school students in the area of water. This is important for the future citizens and decision makers in the region.

Inflation and automatic salary increases have decreased our available funding most years. The University has had to supplement our basic funding to keep us functional.

Strategy: 3-2-1 Edwards Aquifer Research and Data Center

5 School Safety Center

Category: Across the Board Reductions

Item Comment: Texas has the second largest public school system in the country that educates over 5 million students. A lack of funding would create a significant deficiency in our state for providing a clearinghouse of school safety resources that are research driven and mapped to state standards. This is critical given the threats, hazards, and vulnerabilities that our schools face on a daily basis. In recent years, Texas schools have been impacted by natural and technological incidents such as hurricanes, floods, wildfires, tornadoes, and gas explosions. Texas schools also have been affected by rare, but nonetheless, tragic acts of violence, including school shootings, assaults, and suicides. These events have reinforced the need for the TxSSC to assist in preparing schools to manage a variety of potential emergencies. The TxSSC provides a critical service to schools by delivering education and resources that are supported by research in the area of school safety. The implications for not funding this special item would result in a loss of targeted school safety research and training for approximately 9,000 schools, thus leading to a weakness in our educational systems. The TxSSC serves as a viable clearinghouse to assist schools across the state in developing and implementing effective school safety initiatives that save lives and property, improve school climate, and encourage an optimal learning environment for students.

| | | | \$ | 14,976,027 | \$ 13,623,241 |

Special Item: 1 Improvement of Geography Education

(1) Year Special Item: 1996 Original Appropriations: \$50,000

(2) Mission of Special Item:

The Texas Alliance for Geographic Education (Texas Alliance) is part of the National Geographic Society's Network of Alliances for Geographic Education (Network of Alliances). The Texas Alliance is a university-based, statewide partnership between university faculty and K-12 educators that provides teachers with professional development, networking, model programs, and teaching materials in geography education.

The Texas Alliance was established in 1986, one of eight original state alliances sponsored by the National Geographic Society (NGS).

The Texas Alliance for Geographic Education recognizes that there is a lack of understanding of geography's value and its application within the Texas educational community. To address this issue, the Texas Alliance supports and advocates for geographic education in the Texas educational community.

(3) (a) Major Accomplishments to Date:

During a visit to the Texas State campus, Mr. Gilbert M. Grosvenor, former Chair of the National Geographic Society's Board of Trustees, stated publicly that the Texas Alliance for Geographic Education is the flagship Alliance for the 53 state programs supported by the National Geographic Society.

- The Texas Alliance is the only geography education support network for teachers in Texas.
- The Texas Alliance has hosted over 60 summer institutes, hundreds of workshops, and trained over 5,000 teachers statewide.

• The Texas Alliance cooperates with the Texas Council for Social Studies to offer 30 hours of geography-focused professional development at the annual statewide conference.

- The Texas Alliance participated in GIS Day in 2013 and 2014, reaching over 1,500 students and teachers annually.
- Texas has geography standards in grades K-12 social studies courses.
- Texas has the second largest AP Human Geography enrollment in the country.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Texas Alliance will focus on the geography knowledge and skills standards identified across the K-12 social studies curriculum. There is a tremendous need for geography resources and support for teachers with over 4 million students enrolled in a course with geography standards. The Texas Alliance will continue to support and expand professional development and materials to support teachers in their development of geographic concepts and pedagogy to meet these standards.

- Train teachers on ways to use geospatial technologies in their classroom to address 21st century skills and Texas College and Career Readiness Standards.
- Recruit newly certified teachers, to include at least 200 new preservice and new teacher members.
- Host Geographic Information Services booths to reach at least 1,500 teachers and students annually.
- Host thirty-hours of professional development sessions at the Texas Council for the Social Studies conference, each year.
- Host at least ten professional development sessions in partnership with regional education entities around the state each year.

(4) Funding Source Prior to Receiving Special Item Funding:

National Geographic Education Foundation and Sid Richardson Foundation

(5) Formula Funding:

Ν

(6) Startup Funding:

Ν

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

National Geographic Education Foundation: 2015-2016: \$47,500 2016-2017: \$47,500 2017-2018: \$47,500 2018-2019: \$47,500

Humanities Texas: 2015: \$5000 2016: \$3000 2017: \$5000 2018: \$5000 2019: \$5000 Esri: 2015: \$5000 2016: \$5000 2017: \$5000

2018: \$5000 2019: \$5000

NGEF

2015 \$38,506 2016 \$39,246 2017 \$39,246

2018 \$39,246 2019 \$39,246

(9) Consequences of Not Funding:

Not funding the Improvement of Geography Education special item may result in the potential loss of National Geographic Society (NGS) support, as well as other external funding. The special item funding supports a full-time staff person dedicated to grant writing, program development, and evaluation for the Texas Alliance. Without the funding, the organization would not have the capacity to secure external funds or support programming at the level of success that it does today. The special item support enables the Texas Alliance to leverage external funds to build one of the strongest and most productive NGS Alliances in the United States. To lose this support would transmit a message to NGS and other funders that the State of Texas does not support the work of the Texas Alliance in improving geography education.

Special Item: 2 Round Rock Higher Education Center

(1) Year Special Item: 1996 Original Appropriations: \$400,000

(2) Mission of Special Item:

The mission of the Round Rock Campus is to meet the higher education and workforce training needs of North Austin and Williamson County. Although the RRC started as an evening program and about 90% of the students still continue to enroll on a part time basis in the evenings and work during the daytime, the Nursing students are daytime students and utilize campuses services throughout the daytime. Additionally, because the classrooms in the main building, the Avery Building, are at close to 100% utilization in the evenings, classes are moving into the daytime and will continue to do so over the next two academic years. The Health Professionals Building #1, which will open in summer of 2018 will serve students who are also primarily daytime students. This shift to daytime enrollments will continue to require expansion of student support services and programming and will require very careful scheduling of classrooms. Continued funding of the staff positions is needed in order to meet the growing demand.

(3) (a) Major Accomplishments to Date:

The RRC (MITC) started in 1998 in a portable building at a local high school. The campus now has two buildings on 101 acres. Fall 2015 marked the beginning of the 10th year of the RRC at its permanent campus. The number of courses offered continues to rise and the average number of students per class section has risen. Undergraduate programs, in particular, are growing due to the proximity to Austin Community College. Average class size has grown to 18.4 per class. The College of Education continues to comprise the largest portion of the enrollments followed by the College of Business. More on-line and hybrid classes are being offered to Round Rock students. The Nursing Program opened in the Fall of 2010 and the on-line Masters in Nursing Program opened in Fall 2013. A new undergraduate program in General Studies started in Spring 2015 and has good enrollment.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Groundbreaking for the third building will occur in May 2016 and in summer of 2018, three programs in the College of Health Professions will begin to offer classes in Round Rock. These programs include, the doctorate in Physical Therapy, programs in Communication Disorders and Respiratory Care. All three programs require students to practice on clients so there will be a speech disorder clinic, a physical therapy clinic, and a sleeping disorders lab. The opening of the third building will bring another 560 full time students to the Round Rock Campus and some 40 to 60 faculty members.

(4) Funding Source Prior to Receiving Special Item Funding:

The MITC was a new initiative created in 1998 with the Special Item Funding of \$400,000. Prior to that, two staff members were assigned on a part time basis through Texas State University.

(5) Formula Funding: N

(6) Startup Funding:

Ν

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

RRHEC generates a small amount of auxiliary revenue from events, workshops, and training. The amount varies and is unpredictable.

(9) Consequences of Not Funding:

If funding is not available for the staff positions listed above, current operations including scheduling of courses, advising students, providing financial aid assistance, and updating social media sites would be affected.

Special Item: 3 School Safety Center (TxSSC)

(1) Year Special Item: 2007 Original Appropriations: \$1,500,000

(2) Mission of Special Item:

The Texas School Safety Center (TxSSC) at Texas State University was created in 1999 by former Governor George W. Bush following the tragic shooting at Columbine High School. The TxSSC, an official university-level research center, is tasked in Chapter 37 of the Texas Education Code and the Governor's Homeland Security Strategic Plan with key school safety initiatives and mandates. Specifically, the TxSSC serves as a central clearinghouse for the dissemination of school safety and security information through research, training, and technical assistance for K-12 schools and junior colleges throughout the state of Texas. Additionally, the TxSSC is to serve as a resource for the prevention of youth violence and the promotion of safety in the state.

(3) (a) Major Accomplishments to Date:

Developed statewide guidance on school safety standards that incorporate best practices at the federal and state level for all 1,026 districts in Texas.

Developed a comprehensive online High-Quality Multi-hazard Emergency Operations Planning Tool to assist school districts in their planning processes.

Implemented data collection systems that serve as a repository for school safety data to be analyzed and published to inform the field of school safety.

Recognized by FEMA as a national model in youth preparedness efforts.

Identified and disseminated research-based curricula in school safety through training, on-line resources/tools, educational videos, webinars, and manuals.

Conducted research in the use of school-based law enforcement and violence in schools to inform training efforts.

Assisted Texas Commission on Law Enforcement with a state mandated training curriculum for school-based law enforcement officers.

The center is one of the only School Safety Centers in the nation that has designed and developed a full featured modern website, and regularly publishes new content, resources, and tools through this medium.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Conduct and disseminate research through a variety of mediums (e.g., technical reports, practitioner guides, academic publications, web/training content) in an effort to engage all stakeholders in the area of school safety, security, and emergency management.

Collaborate with statewide partners to leverage resources to address school safety issues.

Identify research-based school safety practices that are proven to be effective and cost-efficient for all school districts.

Schedule 9: Special Item Information 85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

(4) Funding Source Prior to Receiving Special Item Funding:

FY07 - Office of the Governor, Criminal Justice Division \$450,000

FY07 - Texas Education Agency \$200,000

(5) Formula Funding: N

(6) Startup Funding:

Ν

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

FY19 - Projected Program Income \$200,000

- FY18 Projected Program Income \$200,000
- FY17 Projected Program Income \$200,000
- FY16 Projected Program Income \$200,000
- FY15 Program Income \$169,001
- FY14 Program Income \$190,390
- FY13 Program Income \$223,662
- FY12 Program Income \$197,417
- FY11 Program Income \$207,244
- FY10 Program Income \$215,049

(9) Consequences of Not Funding:

Texas has the second largest public school system in the country that educates over 5 million students. A lack of funding would create a significant deficiency in our state for providing a clearinghouse of school safety resources that are research driven and mapped to state standards. This is critical given the threats, hazards, and vulnerabilities that our schools face on a daily basis. In recent years, Texas schools have been impacted by natural and technological incidents such as hurricanes, floods, wildfires, tornadoes, and gas explosions. Texas schools also have been affected by rare, but nonetheless, tragic acts of violence, including school shootings, assaults, and suicides. These events have reinforced the need for the TxSSC to assist in preparing schools to manage a variety of potential emergencies. The TxSSC provides a critical service to schools by delivering education and resources that are supported by research in the area of school safety. The implications for not funding this special item would result in a loss of targeted school safety research and training for approximately 9,000 schools, thus leading to a weakness in our educational systems. The TxSSC serves as a viable clearinghouse to assist schools across the state in developing and implementing effective school safety initiatives that save lives and property, improve school climate, and encourage an optimal learning environment for students.

Special Item: 4 Edwards Aquifer Research and Data Center (EARDC)

(1) Year Special Item: 1980 Original Appropriations: \$192,000

(2) Mission of Special Item:

The mission of the Special Item is to perform research and disseminate information about the Edwards Aquifer and the regional water resources; to offer laboratory and technical services to public and private entities and support graduate research; to use data created to provide educational services for schools and the public. The Center coordinates its activities with those of other water related centers at Texas State and in Texas. The Center provides opportunities for students to get experience working in the water resources field. We also provide jobs for many students and provide facilities for graduate and undergraduate research. Through our education program of field days and summer camps we expose numerous precollege students to experiences in the water field. The time they spend at our center allows them to get insight into the college experience and may encourage them to seek admission to Texas State in the future. It is important that we have an informed citizenry regarding water resources and we feel our programs aimed specifically at students will promote this. The importance of having a working water laboratory that is always available to support research, classes, and educational activities cannot be overemphasized. Few universities have NELAC certified laboratories that can produce data acceptable to state and federal agencies. A better understanding of the activities of the Center can be gained by looking at our website.

(3) (a) Major Accomplishments to Date:

The EARDC has supported many students, at all levels, in studies related to the aquifer and water resources in the region. It has produced numerous peer-reviewed publications and technical reports utilized by officials in and out of the region. EARDC produced an accurate model for predicting spring flows. Our web site is a significant source of information on water and we post data from wells throughout the region, in order to keep the public informed about aquifer conditions. The EARDC has sponsored and cosponsored water related meetings, which have had many attendees. More information about the Center, can be viewed on our web site: http://www.eardc.txstate.edu.

We have cosponsored several water meetings with the Edwards Aquifer Authority and other local and regional organizations, and also host the Ed Cape Seminar each year.

EARDC staff work on a daily basis with members of the public, as well as work and collaborate with researchers at other institutions, graduate students, undergraduate students, and staff and faculty at Texas State University and assist all in learning, performing research, and complying with regulations.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Schedule 9: Special Item Information 85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

We anticipate making progress in understanding the Aquifer system and how it can be managed to meet Federal and State requirements. In addition the adjacent Trinity Aquifer in the PGMA that includes 10 Central Texas counties is being studied. We are currently providing information that will be useful in refining the Trinity Aquifer Model in the area encompassed by the Hill Country Groundwater Alliance (Composed of county Groundwater Districts in Central Texas over the Trinity Aquifer). We are involved with studies of other aquifers in Texas. We have staff and students working in these areas with external funding. We are using knowledge obtained to assist with planning for proper management in these areas. We have a NELAC certified laboratory that is required for all laboratories supplying information to the TCEQ in Texas. EARDC is a certified Drinking Water Laboratory associated with a University in Texas. We support students in the new Aquatic Resources PhD program at Texas State in our research programs. We also have monitoring studies with the Texas Commission for Environmental Quality (TCEQ) and internships with Texas Parks and Wildlife (TPWD). These internships help students gain practical experience in real work situations and provide for future employment with these agencies. We are providing information for the Science Committee of the EAA that is reviewing the Habitat Conservation Plan submitted to the USFWS, and perform applied research for the HCP.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding: N

(6) Startup Funding: N

(7) Transition Funding: N

(8) Non-general Revenue Sources of Funding:

Water Quality Studies, Educational Outreach, Research & Lab Services

FY 05 Funding \$ 539,727 FY 06 Funding \$ 710,848 FY 07 Funding \$ 678,983 FY 08 Funding \$ 624,485 FY 09 Funding \$ 740,150 \$ 858,362 FY 10 Funding FY 11 Funding \$ 724,960 FY 12 Funding \$ 539,328 FY 13 Funding \$ 512,245 FY 14 Funding \$ 506,397 FY 15 Funding \$ 475,766 FY 16 Funding \$ 476,000

 FY 17 Funding
 \$ 476,000

 FY 18 Funding
 \$ 476,000

 FY 19 Funding
 \$ 476,000

The Special Item funding is used to leverage this funding.

(9) Consequences of Not Funding:

Loss of funding would result in our being unable to maintain the level of services, educational outreach, and support of student research activities. This is already demonstrated by decreased external funding. This occurs at a time when the demand is increasing. We would have fewer funds to leverage for match with external funding. We try to increase our outside funding every year and this funding is critical in allowing us to continue that. Hydrologic conditions in the region (floods and droughts) mean that our services, information, and activities are in great demand and we need the requested funds to meet that demand. Our center is a major supporter of the Aquatic Resources PhD program at Texas State.

We provide an opportunity for education of public & private school students in the area of water. This is important for the future citizens and decision makers in the region.

Inflation and automatic salary increases have decreased our available funding most years. The University has had to supplement our basic funding to keep us functional.

Special Item: 5 Semiconductor Manufacturing and Research Initiative

(1) Year Special Item: 2000 Original Appropriations: \$100,000

(2) Mission of Special Item:

The primary mission is to develop the scientists, engineers and other technical/professionals for the Texas workforce to promote economic development. An underlying theme is an increased emphasis on interdisciplinary research, with a strong focus of research training at all levels. We have hired numerous research-intensive faculty in the past eight years. The future competitiveness of Texas and the U.S. is tied to technological innovation tightly coupled with commercialization, which will come largely from such scientists using new paradigms of interdisciplinary research and technology transfer. Texas State has positioned itself to be closely aligned with Texas industry by establishing programs to create a cutting-edge materials science, engineering and commercialization infrastructure focused on research, development, and validation of materials for the next generation of electronics, medicines, plastics, sensors, and renewable energy. In addition, these academic and research capabilities are being supported by an institutional 'top-to bottom' entrepreneurial and commercialization culture. Our intention is to serve as a launching platform for developing effective entrepreneurial leaders for the advancement of global innovation, including increasing total technical degree holders both enrolled and graduated with an emphasis on outreach to women and minorities.

(3) (a) Major Accomplishments to Date:

This Initiative has impacted the education of nearly 1600 graduates with technical/professional/engineering degrees, including 50 graduate research projects and over 100 undergraduate research projects. External funding associated for research activities enabled by the Special Item continues to grow each yerar. The research facilities supported allow us to attract both quality students and quality faculty. We have engaged with numerous large and small local industries for research and development, stimulating economic development in Central Texas. Our approach has been validated as attested by many factors - we have increased research expenditures significantly and doubled PhD output since FY2007 allowing the attainment of Emerging Research Status; the Carnegie Foundation for the Advancement of Teaching reclassified Texas State under "Doctoral Universities: Higher Research Activity," the second-highest designation for research institutions in the country under Carnegie's respected classification system; we have basically doubled the size of STAR Park, our incubator facilities; and enrollment in our science, technology and engineering programs continues to grow exponentially. The facilities supported by this special item also aid in economic development - we have attracted tmultiple start-up companies to Central Texas and engaged with many other industry components

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We expect to impact the education of over 500 additional professionals for the high-tech, semiconductor, and nanobiotechnology industries at the undergraduate and graduate level; engage 100 high school students to tour our facility for outreach, continue workshops for teachers & Technical/Community College teachers; and enable at least 25 graduate projects and 50 undergraduate projects. We plan to maintain our upward trajectory in obtaining research funding and establishing industrial relationships.

(4) Funding Source Prior to Receiving Special Item Funding:

Building and equipment funds – University E&G & HEAF – \$1.6 million Ingram Family - \$5.0 million toward establishment of a School of Engineering Ν

Ν

Ν

754 Texas State University

(5) Formula Funding: (6) Startup Funding: (7) Transition Funding: (8) Non-general Revenue Sources of Funding: We have been successful at obtaining over \$26M in funding for projects related to the Semiconductor Initiative since its inception. The major sources of funding (new awards) for FY2015 and FY2016 are listed:

Total FY2015: \$3.7 M National Science Foundation \$0.1M U.S. Department of Defense \$2.2M Private Industry \$0.5M US Dept. of Energy \$0.4M NASA \$0.3M

Total FY2016: \$0.8 M National Science Foundation \$0.4M U.S. Dept. of Energy \$0.4M

Projections: We have been averaging about \$2.5M per year in the last several years. We anticipate that this amount will grow over the next several years. Projected amounts are FY2017: \$2.5M; FY2018: \$3M; FY2019: \$3.5 M

(9) Consequences of Not Funding:

Not funding this special item would seriously impede the progress being made to create engineering/technical professionals for the Texas workforce, and harm our developing programs in Engineering and Materials Science, Engineering and Commercialization. It would reduce our ability to provide outreach to high school and two-year college students to expose them to science/engineering/ technical careers. It would result in a reduction of output of technical/professional minorities and women.

Special Item: 6 Small Business Development Center

(1) Year Special Item: 2003 Original Appropriations: \$108,696

(2) Mission of Special Item:

The Mission of the Texas State Small Business Development Center (SBDC) is to provide management and technical assistance to small business owners and entrepreneurs to promote the development of small businesses and thereby, the creation of new jobs and enhance the economic vitality of Texas.

(3) (a) Major Accomplishments to Date:

During the previous Fiscal Year (October 1, 2014- September 30, 2015), the Texas State SBDC generated 510 new jobs and assisted small businesses in retaining 540 jobs. In addition, the Texas State SBDC provided business assistance and business training to 1,251 small business clients with over 4,809 hours dedicated to this effort. These efforts resulted in starting 54 new businesses and expanding 66 existing businesses with capital investments of \$50,569,817.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Texas State SBDC projects the creation of 1000 new jobs over the next two years. Additionally, the Texas State SBDC projects assisting the development of 110 small businesses and expanding 140 businesses.

(4) Funding Source Prior to Receiving Special Item Funding:

2002 Austin Community College

(5) Formula Funding: N

```
(6) Startup Funding:
N
```

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

2013 U.S. Small Business Administration \$297,796 2014 U.S. Small Business Administration \$297,796 2015 U.S. Small Business Administration \$310,240 2016 U.S. Small Business Administration \$310,240

2017 U.S. Small Business Administration \$338,4552018 U.S. Small Business Administration \$338,455 (tentative)2019 U.S. Small Business Administration \$338,455 (tentative)

(9) Consequences of Not Funding:

The consequences of not funding this program would be increases in unemployment in this region of Texas, reduced small business formations and subsequent economic downturns which would lead to reduced tax revenue at all levels of government and increases in the business failure rate. With the current emphasis on job creation and small business formation and expansion, it would be counter intuitive to discontinue support for programs of this kind

Special Item: 7 Institutional Enhancement

(1) Year Special Item: 2006 Original Appropriations: \$1,543,773

(2) Mission of Special Item:

To support our core strategy, namely instruction and operations by providing funding for new academic program start-up and faculty salaries.

(3) (a) Major Accomplishments to Date:

See our key performance indicators.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

See our key performance indicators.

(4) Funding Source Prior to Receiving Special Item Funding:

Item subsumed former special items for Minority Faculty Development, Scholarships, and Improvement in Geography.

(5) Formula Funding:

Ν

(6) Startup Funding: N

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

This would result in the loss of \$1,921,881 in funding for our core mission. Page

Special Item: 8 **Restoration of the 4% Reduction** (1) Year Special Item: 2018 Original Appropriations: \$179,538 (2) Mission of Special Item: Pending Admin Statement (3) (a) Major Accomplishments to Date: (3) (b) Major Accomplishments Expected During the Next 2 Years: (4) Funding Source Prior to Receiving Special Item Funding: (5) Formula Funding: (6) Startup Funding: (7) Transition Funding: (8) Non-general Revenue Sources of Funding:

NA

NA

Ν

Ν

Ν

NA

(9) Consequences of Not Funding:

EARDC: Loss of funding would result in our being unable to maintain the level of services, educational outreach, and support of research activities. We would have fewer funds to leverage for match with external funding.

Semiconductor: Loss of funding would impede the progress being made to create engineering/technical professionals for the Texas workforce, and harm our developing programs in Engineering and Materials Science, Engineering and Commercialization. It would reduce our ability to provide outreach to high school and two-year college students to expose them to science/engineering/ technical careers. It would result in a reduction of output of technical/professional minorities and women.

Geography: Loss of funding may result in the potential loss of National Geographic Society (NGS) support, as well as other external funding. Current funding supports a full-time staff person dedicated to grant writing, program development, and evaluation for the Texas Alliance. Without the funding, the organization would not have the capacity to secure external funds or support programming at the level of success that it does today. The special item support enables the Texas Alliance to leverage external funds to build one of the strongest and most productive NGS Alliances in the United States. To lose this support would transmit a message to NGS and other funders that the State of Texas does not support the work of the Texas Alliance in improving geography education.

Special Item:9ALERRT(1) Year Special Item:2018Original Appropriations:\$2,000,000

(2) Mission of Special Item:

Since the early 2000's, the frequency of active shooter events has dramatically increased. We have seen an average of 18 active shooter events per year during the last five years. Additionally, there were three terrorism inspired attacks in 2015. One of which occurred in Garland, TX. Internationally, there have been a number of attacks directly planned and organized by terrorist groups such as ISIS. The most recent of these was in Paris. Terrorist groups are attempting to organize and launch similar attacks here.

In order to mitigate the damage caused by these attacks, law enforcement officers must be effectively trained and prepared. This is the mission of the Advanced Law Enforcement Rapid Response Training (ALERRT) Center at Texas State University. ALERRT has developed a definitive, research-based standard in active shooter response. ALERRT tactics involve the immediate and decisive deployment of law enforcement officers to stop the killing as quickly as possible. After the killing has stopped, ALERRT teaches lifesaving skills that can be utilized to keep those who have been wounded from dying.

In addition, ALERRT has developed a curriculum that is specifically designed for law enforcement officers in outdoor situations. The Exterior Response to Active Shooter Events (ERASE) program allows officers along the border of Mexico to effectively and safely handle potentially deadly situations.

(3) (a) Major Accomplishments to Date:

ALERRT has trained more than 85,000 officers trained since 2002,. We are recognized by the FBI as the national standard in active shooter response training, Officers have credited our training with improving their response during the Ft. Hood, Garland, and Dallas attacks.

If we are fully funded, we expect to conduct/support at least 300 classes that will train at least 10,000 officers in the state of Texas during the next two years.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The ALERRT program delivers active shooter response and related training courses to State and Local Law Enforcement Officers throughout the State of Texas at no cost to the law enforcement agencies. ALERRT is requesting \$2 million per year and proposing to deliver the multiple training course to officers. At the end of five years, we will have delivered more than 800 classes and trained more than 27,000 officers across the state of Texas. Our train-the-trainer programs also allow officers to return to their departments to train all of their people. We attempt to capture these numbers though our indirect courses by providing participating departments with manuals, paperwork, and equipment to conduct these classes in return for reporting their training to us, but we know that departments often have their own supplies and do not report to us. Because of this, 27,000 is an underestimate of the number of people actually trained.

(4) Funding Source Prior to Receiving Special Item Funding:

ALERRT began in 2002 and has received funding from Criminal Justice Division of the Governor's Office.

(5) Formula Funding:

Ν

(6) Startup Funding:

Ν

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

We have received federal grant money from Bureau of Justice Assistance, Department of Homeland Security, and members of the National Preparedness Consortium. This funding is competitive and highly variable. We have also occasionally had agencies contract with us to deliver courses for them when the course would not be covered by our grant funds.

(9) Consequences of Not Funding:

The amount of active shooter training that we provide in the State of Texas would be dramatically reduced. Our Federal funders limit the amount of training that we can conduct in any single state.

Special Item: 10 Materials Application Research Cntr

(1) Year Special Item: 2018 Original Appropriations: \$3,295,000

(2) Mission of Special Item:

The primary focus of MARC is to accelerate the development and deployment of new technologies using advanced materials to support the following: the next generation of sensors for a wide variety of applications (ranging from smart infrastructure in support of autonomous vehicles to biomarkers for health), renewable energy devices, micro-grid management, advanced polymers, microelectronics, rapid prototyping to advance product commercialization and pilot scale production to move from concept to production.

MARC will provide a seamless environment integrating applied multidisciplinary academic research, industry sponsored projects, and experiential learning opportunities for students addressing creation of a talent pipeline. By providing access to specialized tools and expertise early stage firms developing tangible products will be able to bypass the large initial capital outlays which pose a significant barrier to market entry, and small to mid-sized companies will be enabled to more quickly develop and commercialize new products.

(3) (a) Major Accomplishments to Date:

Over the past 3 years multidisciplinary student teams have been supported in development of startup companies focused upon commercialization of tangible products. Teams have had access to specialized space, core facilities and limited startup funds. Two student led companies have emerged, one receiving significant equity funding. Our goal is to spin off two new firms per year.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Over the past 3 years multidisciplinary student teams have been supported in development of startup companies focused upon commercialization of tangible products. Teams have had access to specialized space, core facilities and limited startup funds. Two student led companies have emerged, one receiving significant equity funding. Our goal is to spin off two new firms per year.

MARC will provide a combination of specialized tool sets, facilities and access to talent focused upon product evaluation, company formation, firm growth, product commercialization and company scaleup. By integrating student experiential learning and a focused student startup program, MARC will support development of a robust talent pipeline for the region.

(4) Funding Source Prior to Receiving Special Item Funding:

Concerted efforts at student entrepreneurship started in FY2015 supported by limited internal funding on a pilot basis. EDA funding for one year of Entrepreneur in Residence

(5) Formula Funding:

Ν

(6) Startup Funding:

Ν

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

Texas State has proven the concept through such avenues as the Materials and Analysis Research Service Centers, Advanced Polymers and Nanomaterials Lab and the STAR SEEK student entrepreneurship programs. While each is successful in their own right and has illustrated the potential for contributing to regional economic success, each is currently limited in scope. The creation of MARC will provide the resources needed to develop a comprehensive and integrated approach. Texas State is unique in the Central Texas region in its focus upon supporting creation of successful firms taking tangible products to market. MARC would provide access initially to other universities within the Texas State System and over time other institutions in Texas and the region. Not funding MARC will stall the current efforts and significantly flatten the rate of economic development in Central Texas related to high tech, tangible product manufacturing.

Special Item: 11 Identification of Human Remains

(1) Year Special Item: 2018 Original Appropriations: \$115,000

(2) Mission of Special Item:

In 2012, Brooks County, Texas gained media attention for a dramatic increase in the number of migrant deaths. In 2013, Brooks County received state funds to send all remains to Webb County for autopsy, DNA sampling, and identification efforts. Prior to 2013, all unidentified human remains found in Brooks County were sent to a funeral home in Mission. The remains not identified through funeral home efforts were buried in Sacred Heart Memorial Park in Falfurrias. Although two seasons of exhumations have taken place, there are still an estimated 60 individuals buried in Sacred Heart. While these individuals are presumed migrants, there could be unidentified American citizens buried in the cemetery. According to the Texas Criminal Code of Procedures Chapters 49 (deaths requiring and inquest) and 63 (submission of DNA samples to University of North Texas), these individuals need exhumation, analysis, and DNA sample submission for identification purposes. The proposed project is a direct benefit to the community of Brooks, Cameron, and Starr counties as it helps local law enforcement and Justices of the Peace fulfill the TCCP 49 and 63. Further, this project benefits all persons living in Texas that are searching for a missing family member. If these burials are not exhumed, families will never know the ultimate fate of their loved ones.

(3) (a) Major Accomplishments to Date:

Since funding was secured to hire a post-doctoral associate, all laboratory efforts have doubled this year. Since 2013 we have received 87 human remains for analysis and identification efforts.

86% Processed, 84% NamUs entries complete, 76% anthropology reports completed, 77% DNA submitted to UNT for CODIS (DNA comparisons not complete by UNT for all submissions), 10% identified, 8% repatriated.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Accomplishments next two years:

The target number for all output measures is 126.

• Exhumations: Exhumation of 60 remains from Brooks, 40 from Cameron, 26 from Starr.

- Processing: The remains will be cleaned free of soft tissue prior to analysis.
- Analysis: Case reports will be generated that include estimates of age, sex, ancestry, and height. Trauma, pathology, and individualizing features will be noted.

• NamUs Entry: All case information will be entered into the National Missing and Unidentified Persons System database that is publicly viewable and searchable by families.

• DNA Submission: DNA samples will be submitted to UNT.

• Cleaning of Personal Effects: Personal effects will be cleaned and photographed with NamUs upload.

• Cross-referencing cases with missing persons data from NamUS and NGOs: All case information will be cross-referenced to facilitate identifications as not all missing persons information from Mexico and Central America is contained within NamUs.

• Submission of Case Reports to Mexican and Central American Consulates: All case reports will be submitted to consulates to facilitate identifications.

(4) Funding Source Prior to Receiving Special Item Funding:

Funding was received in 2016 from the Office of the Governor (\$53,384.00) in order to hire a full time laboratory technician to analyze human remains and help facilitate identifications.

(5) Formula Funding: N

(6) Startup Funding: N

(7) Transition Funding: N

(8) Non-general Revenue Sources of Funding:

This project was established in 2013 based on voluntary efforts. Funding was received from the Rachal Foundation (\$80,000.00) in 2015 to hire a post-doctoral research associate to analyze human remains and write case reports and to hire a 20-hour research associate to help facilitate identifications for a one-year period.

Initial county surveys were conducted which led to the discovery of 126 burials in need of exhumation with funding from a Research Enhancement Program grant (\$8,000.00) (institutional funding from Texas State University's recovered indirect cost).

(9) Consequences of Not Funding:

Without funding, it is not possible to continue exhumations and analysis of human remains. While the Forensic Anthropology Center at Texas State University provides volunteer services to law enforcement agencies for search and recovery operations and identification efforts, the crisis in South Texas and number of remains that are in need of exhumation is the equivalent of a mass disaster. The process of exhumation, analysis, and identification efforts must be funded. Basic costs of lodging, meals, equipment are requested for exhumations. Laboratory costs consist of consumables and funding for a full-time post-doctoral associate, part-time laboratory technician, and part-time human remains processor.

Further, these efforts help law enforcement agencies comply with the TCCP 49 and 63 in addition to providing families of the missing their only opportunity to find out what happened to their loved one.
